S100B-CR-W

- Certified by TUV EN14604
- Dual emission and one-reception infrared photoelectric type technology
- Insect-proof net design
- Test/hush function
- Ten years battery

Personal alarm

A personal alarm is a small, handheld electronic device that emits a very high-volume sound when a button is pressed or a pin is pulled.

Door and window alarm

The door and window alarm is usually installed on the door or window. When the two are separated or close to a certain distance so as to achieve the purpose of reminder and anti-theft.

Water Leak Detector

The water leak detector is a sensor that detects whether water leakage occurs in the measured range. Once water leakage occurs, an alarm will be issued immediately to prevent related losses and harm caused by water leakage accidents.

Key Finder

Key finders are small electronic devices used to locate misplaced or stolen objects, such as keys, luggage, purses, wallets, pets, laptop computers, toddlers, cellphones, equipment, or tools, and to transmit alerts.

Safety Hammer

Safety hammer is installed on vehicles, especially emergency escape tools for large vehicles. Some safety hammers are equipped with a cutter, allowing the user to cut the seat belt to facilitate escape when the seat belt cannot be unbuckled.
